JL. KOMP, TALAGO PERMAI B/11

I am a last-year Information Systems student at Andalas University with a passion for web development. I specialize in back-end development but also have a strong interest in front-end development. My goal is to become a Full Stack Web Developer, Back-End Developer, or Front-End Developer, creating efficient, scalable, and user-friendly web applications

## Work Experiences

### Balai Pemasyarakatan Kota Pekanbaru - Pekanbaru, Indonesia

Oct 2023 - Feb 2024

#### Back End Developer (Freelancer)

The Balai Pemasyarakatan is a community supervision office responsible for managing prisoners in Pekanbaru.

- Develop an internal information system to manage employee data, activities, and inmate records, with web and mobile support.

### The Office of the Governor of West Sumatra, Organization Bureau of the Regional Secretariat - Padang, Sumatera Barat, Indonesia

Jan 2024 - Feb 2024

#### Back End Developer Intern

The Organization Bureau is a unit in the Secretariat of West Sumatra Province that assists in the formulation, coordination, monitoring, and evaluation of regional policies related to institutional matters, job analysis, bureaucratic reform, and performance accountability.

- Designing and developing a decision support system to determine the best employee performance
- Designing and developing a community satisfaction survey system.

### PT Metro Indonesian Software - Padang, Sumatera Barat, Indonesia

Feb 2024 - Apr 2024

#### Back End Developer Intern

Metro Indonesian Software is a leading technology company in Indonesia that prioritizes software development.

- Developing a lawyer information system API based on a website using Express.js
- Developing a website-based room booking information system API using Express.js

### PT Metro Indonesian Software - Padang, Sumatera Barat, Indonesia

May 2024 - Present

#### Front End Developer

Metro Indonesian Software is a leading technology company in Indonesia that prioritizes software development.

- Designing and constructing the Naima Healthcare (Pharmacy) information system using React.js and Tailwind CSS. This system will be developed to emulate an ERP (Enterprise Resource Planning) solution.
- Designing and building a Tatitatu information system using React Js and Tailwind CSS. This system was developed to be able to carry out all business and sales processes of a cosmetics company systematically.
- Create a wedding invitation template online using vue.js which has been integrated into a wedding invitation API
